Triumph Geo-Synthetics, Inc.

Santa Ana – Cissy McCaa, owner of Triumph Geo-Synthetics, Inc. of Anaheim has expanded her business to include two new product lines with the assistance received from a U. S. Small Business Administration loan. “Through a Service Corp of Retired Executives (SCORE) workshop” Ms. McCaa said, “I learned that understanding the financial statements is critical to business success.” Ms. McCaa attributes her success to the assistance she received with the SBA loan and to her employees which make the business run smoothly and professionally.

Triumph Geo-Synthetics, Inc. was established in 1991. Triumph Geo-Synthetics was initially created to support Ms. McCaa’s glass art endeavors. However, as Triumph Geo-Synthetics grew and became a sought after business by national representatives of the geosynthetics field, Ms. McCaa turned her attention to the business full time.

Triumph Geo-Synthetics provides road paving, slope reinforcement, soil stabilization, erosion control, and storm water compliance products to the construction industry. The business is affiliated with the Association of General Contractors, the International GeoSynthetics Society, International Erosion Control Association and is Cal Trans DBE/WBE certified, State of California DBE certified and OCTA DBE certified.

Ms. McCaa was recognized for her business success on October 30, 2003 at the Crowne Plaza Resort in Garden Grove by the U. S. Small Business Administration as part of the SBA’s salute to Minority Enterprise Development.
