Graded Agency:

The U.S. Nuclear Regulatory Commission (NRC) supports its mission and operations through Federal acquisitions with small businesses and is committed to achieving its small business goals. The agency's Small Business Program has implemented an active compliance, technical assistance, and outreach program designed to maximize prime and subcontract opportunities for small businesses. The agency improved upon last year's performance by increasing the engagement between the Small Business Program, acquisition staff, regional buyers, and the small business marketplace, which served to expand the agency's program in both breadth and depth. This led the agency to exceed five out of five of its small business prime contract goals through successful implementation of the Small Business Program's corrective actions plan to achieve the HUBZone goal it missed last year; achieve an historical achievement in contracting with women by awarding the largest amount of dollars to date to women-owned small businesses; and launch the agency's first regional small business event, which was designed to increase awareness of agency buying needs throughout the country and educate businesses on the benefits of the HUBZone program in the Federal procurement marketplace. In addition, the agency exceeded all five of its small business subcontracting goals although the total amount of reported dollars was approved subsequent to SBA's reporting deadline.
