Graded Agency:

The U.S. Nuclear Regulatory Commission (NRC) supports its mission and operations through Federal acquisitions with small businesses and is committed to achieving its small business goals. The agency's Small Business Program has implemented an active compliance, technical assistance, and outreach program designed to maximize prime and subcontract opportunities for small businesses. The NRC improved upon last year's performance by continuing to provide comprehensive market research support and increasing the engagement between the Small Business Program, acquisition staff, regional buyers, and the small business marketplace, which served to expand the agency's program in both breadth and depth.

As a result, the agency accomplished record setting small business performance in the area of contract awards to historically underutilized business zones (HUBZones) and service-disabled veteran-owned small businesses (SDVOSBs). This accomplishment is significant because even though we reported approximately \$50 million less in fiscal year 2019 than in fiscal year 2018, the agency awarded the largest amount of contract dollars to date to not only small businesses, but to HUBZones and SDVOSBs, two of the most difficult goals to achieve in the Federal Government. The interdependency and collaboration among the Small Business Program, agency acquisition staff, and program offices on acquisition planning and market research activities was critical to NRC's historical achievements. Moving forward, the Small Business Program plans to enhance performance where possible through leveraging innovative technologies that foster collaboration, implement strategic corrective actions to address subcontracting achievement, continue to identify areas where we can improve, and seamlessly provide support to internal and external stakeholders regardless of whether we are working in a virtual or in-person capacity.
