Comments:

Department of Energy (DoE) has unique procurement challenges in that DoE does work for other federal agencies (Work for Others) through our national laboratories. The Federal Procurement Database System (FPDS) is currently unable to correctly allocate these "work for other dollars" to the appropriate funding agency, adding a significant amount to DoE's procurement base, which adversely impacts DoE's Procurement Scorecard performance. DoE brought this matter to SBA's attention after the FY11 Scorecard data was finalized and is working closely with SBA and the OMB's Office of Federal Procurement Policy to resolve the issue.

Through our prime and subcontracting opportunities, DOE achieved over \$8 billion in small business procurements in FY11, which is a significant achievement and has resulted in the creation of thousands of jobs and has sparked innovation in science and technology.
