PART 2 – How the Government Buys

A Guide for Small Business – Supplemental Workbook

January 2012

Government Contracting 101
PART 2 – How the Government Buys

U.S. Small Business Administration

Office of Government Contracting & Business Development

December 2011

Guide for Small Business

Welcome to SBA's training program, Government Contracting 101, Part 2.

Jim O'Connor

Office of Government Contracting and Business Development

November 29, 2011

Notes:

Introduction

- Designed to help small businesses understand how the government buys goods and services
- Part 2 (this module)
 - How the government buys
- Parts 1 & 3 (not included in this module)
 - Prime & subcontracting programs, SBA certifications, and WOSB & veterans programs
 - How to sell to the government

Guide for Small Business

This training module is designed to help small businesses understand how the government buys goods and services.

There are three parts to the GC 101 training program. This part, part two, discusses the steps used by the government to purchase what it needs.

Parts one and three provide clarity and training around prime and subcontract assistance programs, SBA certification programs, women and veteran owned small business programs and how to sell to the government.

Notes:

Learning Objectives

1. Understand the contracting methods used by government contracting officers to buy goods and services
2. Know about types of contracts and agreements
3. Understand key parts of the FAR, and
4. Know where to find additional contracting resources

Guide for Small Business

After reviewing this training program you should:

1. Understand the contracting methods used by government contracting officers to buy goods and services.
2. Know about types of contracts and agreements.
3. Understand key parts of the FAR. And,
4. Know where to find additional contracting resources.

Notes:

HOW THE GOVERNMENT BUYS

How the Government Buys

- Government buys from suppliers who meet certain qualifications
- Standardized buying procedures and rules outlined in the FAR are used
- Several contracting methods are employed:
 - Credit card / micro-purchases
 - Simplified acquisition procedures
 - Sealed bidding
 - Contracting by negotiation
 - Consolidated purchasing programs (GSA schedules, GWACs, etc.)

Guide for Small Business

The government applies standardized procedures to buy products and services it needs from suppliers who meet certain qualifications.

Contracting officials use procedures outlined in the Federal Acquisition Regulation, commonly known as the FAR, to guide government purchases.

The primary contracting methods used by the government are: micro-purchases; simplified acquisition procedures; sealed bidding; contract by negotiations; and, consolidated purchasing programs, such as the use of GSA schedules, Government Wide Acquisition Contracts and other multiple award vehicles.

Each of these contracting methods is discussed in the following.

Notes:

Credit Card Opportunities

How the Government Buys

- Individual government purchases under \$3,000
- Competition not required
- Government credit cards are often used
- Micro-purchases are not reserved for small businesses
- **70% of all government procurement transactions are facilitated with a credit card**

FAR 13.301

Guide for Small Business

Generally speaking, government purchases of individual items under \$3,000.00 are considered micro-purchases.

Such government buys do not require competitive bids or quotes and agencies can simply pay using a Government Purchase Card or credit card, without the involvement of a procurement officer.

It is important to note, about 70 percent of all government procurement transactions are for micro-purchases under \$3,000 and are facilitated with a credit card. In fiscal year 2010, this represented over \$19 billion.

Credit card opportunities in the government buying space are huge.

Notes:

Simplified Acquisition Procedures

How the Government Buys

- Federal law streamlines government purchasing for buys under \$150,000
- Simplified acquisition procedures can be used
- Government purchases above \$3,000, but under \$150,000 are reserved for small businesses

FAR 13.000-13.501

Guide for Small Business

The Federal Acquisition Streamlining Act and other statutory amendments removed many competition restrictions on government purchases under \$150,000.

Agencies can use simplified procedures for soliciting and evaluating bids up to \$150,000. Government agencies, however, are still required to advertise all planned purchases over \$25,000 in Federal Business Opportunities or the FBO (www.fedbizopps.gov), the government's online listing and database of available procurement opportunities.

Simplified acquisition procedures require fewer administrative details, fewer approval levels, and less documentation. The procedures require all federal purchases above \$3,000, but under \$150,000, to be reserved for small businesses, an important point.

This small business set-aside applies, unless the contracting official cannot obtain offers from two or more small firms who are competitive on price, quality and delivery.

Notes:

Sealed Bidding

How the Government Buys

- Competitive buying method for specific and clear government requirements
- IFB “Invitation for Bid” is the method used for the sealed bid process
- Contract is awarded to the lowest bidder who is fully responsive
- IFBs are available online for review at: www.fbo.gov

FAR 14.101-14.105

Guide for Small Business

Sealed bidding is how the government buys competitively when its requirements are very specific, clear and complete.

An IFB or “Invitation for Bid” is the method used for the sealed bid process. Typically, an IFB includes a description of the product or service to be acquired, instructions for preparing a bid, the conditions for purchase, delivery, payment and other requirements associated with the bid, including a deadline for bid submissions.

Each sealed bid is opened in a public setting by a government contracting officer, at the time designated in the invitation. All bids are read aloud and recorded. A contract is then awarded by the agency to the lowest bidder who is determined to be fully responsive to the needs of the government.

Government-wide IFBs are available daily for review in the government’s online listing service, Federal Business Opportunities. This electronic service, which is discussed in detail later, also provides direct links to available IFB invitations.

Notes:

Contracting by Negotiation

How the Government Buys

- Preferred method in many federal procurement actions
- Typically used for contracts that will exceed \$150,000 and when highly technical products and services are being sought
- RFPs & RFQs are primary government request vehicles

Guide for Small Business

Contracting by negotiation is used in many federal procurement actions. This is typically a more complicated process for companies wanting to sell to the government. It is also a method that is more time consuming for buying agencies.

This is how it works..... In certain cases, when the value of a government contract exceeds \$150,000 and when it necessitates a highly technical product or service, the government may issue a Request for Proposal. In a typical RFP, the government will request a product or service it needs, and solicit proposals from prospective contractors on how they intend to carry out that request, and at what price. Proposals in response to an RFP can be subject to negotiation after they have been submitted.

When the government is merely checking into the possibility of acquiring a product or service, it may issue a Request for Quotation (RFQ). A response to an RFQ by a prospective contractor is not considered an offer, and consequently, cannot be accepted by the government to form a binding contract.

Government-wide RFPs and RFQs are also available daily for review in the FBO.

Notes:

Consolidated Purchasing Vehicles

How the Government Buys

- Most government agencies have common purchasing needs.
- Centralized purchasing or procurement vehicles are used to realize economies of scale
- Multiple Award Schedules, such as GSA Schedules or Government Wide Acquisition Contracts (GWACs) are important contracting vehicles

FAR 2.101(b)

DFARS 207.170

Guide for Small Business

Most government agencies have common purchasing needs. Sometimes the government can realize economies of scale by centralizing the purchasing of certain types of products or services. This is called consolidated purchasing and multiple award, acquisition vehicles are typically used.

The most common multiple award schedules are GSA Schedules or Government Wide Acquisition Contracts, called G-WACs. These centralized buying vehicles are negotiated by the government with awards to many potential vendors and used by multiple agencies buying goods and services.

Notes:

TYPES OF CONTRACTS & AGREEMENTS

Types of Contracts and Agreements

- Fixed Price
- Cost-Reimbursement
- Incentive Contracts
- Indefinite Delivery Contracts
- Time-and-Materials & Labor-Hour Contracts
- Agreements

Guide for Small Business

OK – so we have discussed the primary buying methods used by the government.

Let's now take a look at the types of contracts and agreements that are typically used --- specifically, fixed price, cost-reimbursement, incentive contracts, indefinite delivery contracts, time and materials and labor hour contracts and agreements.

Notes:

Fixed Price Contracts

Types of Contracts

- Most common type of contracts that small businesses are involved with
- Final price is determined before the work is performed
 - Firm fixed price
 - Fixed price with economic adjustment
 - Fixed price incentive

FAR 16.202-16.204

Guide for Small Business

Fixed-price contracts are the most common types of contracts that small businesses are involved with.

They provide for a firm price or, in appropriate cases, an adjustable price.

A firm-fixed-price contract provides for a price that is not subject to any adjustment on the basis of the contractor's cost experience in performing the contract.

A fixed-price contract with economic price adjustment provides for upward and downward revision of the stated contract price upon the occurrence of specified contingencies.

And finally, a fixed-price incentive contract is a contract that provides for adjusting profit and establishing the final contract price by a formula based on the relationship of final negotiated total cost to total target cost.

Notes:

Cost-Reimbursement Contracts

Types of Contracts

- Cost
- Cost sharing
- Cost plus fixed fee
- Cost plus incentive fee
- Cost plus award fee

FAR 16.302-16.306

Guide for Small Business

Cost-reimbursement contracts provide for payment of allowable incurred costs, to the extent prescribed in the contract. These contracts establish an estimate of total cost for the purpose of obligating funds and establishing a ceiling that the contractor may not exceed without the approval of the contracting officer.

This type of contract is used when — circumstances do not allow the agency to define its requirements sufficiently to allow for a fixed-price type contract, or uncertainties involved in contract performance do not permit costs to be estimated with sufficient accuracy to use any type of fixed-price contract.

A cost contract is a contract in which the contractor receives no fee. A cost-sharing contract is a contract in which the contractor receives no fee and is reimbursed only for an agreed-upon portion of its allowable costs.

A cost-plus-fixed-fee contract is a contract that provides for payment to the contractor of a negotiated fee that is fixed at the inception of the contract.

A cost-plus-incentive-fee contract is a contract that provides for an initially negotiated fee to be adjusted later by a formula based on the relationship of total allowable costs to total target costs.

A cost-plus-award-fee contract is a contract that provides for a fee consisting of a base amount, fixed at inception of the contract and an award amount, based upon a judgmental evaluation by the Government.

Incentive Contracts

Types of Contracts

- Appropriate when firm fixed price contracts are not appropriate and goods can be acquired at a lower cost
- Most incentive contracts only include cost incentives

FAR 16.401-16.406

Guide for Small Business

Incentive contracts are appropriate when a firm-fixed-price contract is not appropriate and the required supplies or services can be acquired at lower costs and, in certain instances, with improved delivery or technical performance, by relating the amount of profit or fee payable under the contract to the contractor's performance.

Incentive contracts are designed to obtain specific acquisition objectives by establishing reasonable and attainable targets that are clearly communicated to the contractor, and

by including appropriate incentive arrangements designed to motivate contractor efforts and discourage contractor inefficiency.

Notes:

Indefinite Delivery Contracts

Types of Contracts

- Definite quantity contracts
- Requirements contracts
- Indefinite delivery contracts

FAR 16.500-16.506

Guide for Small Business

There are three types of indefinite-delivery contracts: definite-quantity contracts, requirements contracts, and indefinite-quantity contracts. The appropriate type of indefinite-delivery contract may be used to acquire supplies or services when the exact times or exact quantities of future deliveries are not known at the time of contract award.

Indefinite-quantity contracts are also known as delivery-order contracts or task-order contracts.

A definite-quantity contract provides for delivery of a definite quantity of specific supplies or services for a fixed period, with deliveries or performance at designated locations.

A requirements contract provides for filling actual purchase requirements for supplies or services during a specified contract period - from one contractor.

An indefinite-quantity contract provides for an indefinite quantity of supplies or services during a fixed period. Quantity limits may be stated as number of units or as dollar values.

Notes:

Indefinite Delivery / Indefinite Quantity

Indefinite Delivery Contracts -- Types of Contracts

- Most common definite quantity contracts are known as IDIQs
- Commonly used for service contracts and A&E services
- IDIQ contracts often issued as Government-Wide Acquisition Contracts

FAR 16.5001(a)

Guide for Small Business

The most common type of indefinite delivery contracts are known as IDIQs or Indefinite delivery / indefinite quantity contracts.

IDIQ contracts are most often used for service contracts and Architect-Engineering services. Awards are usually for base years as well as option years. Agencies place delivery orders - for supplies - or task orders - for services - against a basic contract for individual requirements. An IDIQ contract is typically used when a buying facility cannot predetermine the precise quantities of supplies or services that will be required during the contract period.

IDIQ contracts are often multi-agency contracts issued as Government-Wide Acquisition Contracts or GWACs. Or, they may be government agency-specific contracts. GSA and DOD use IDIQ contracts frequently.

Notes:

Time and Materials – Labor Hour Contracts

Type of Contracts

- Such contracts provide for acquiring supplies and services on the basis of direct labor hours and fixed hourly rates

FAR 16.601-16.603

Guide for Small Business

A time-and-materials contract is designed for acquiring supplies or services on the basis of direct labor hours at specified fixed hourly rates that include wages, overhead, general and administrative expenses, and profit; and actual cost for materials.

A time-and-materials contract is typically only used when it is not possible -- at the time of placing the contract -- to estimate accurately the extent or duration of the work, or to anticipate costs with any reasonable degree of confidence.

A labor-hour contract is a variation of the time-and-materials contract, differing only in that materials are not supplied by the contractor.

Notes:

Agreements

Type of Contracts

- Basic Order Agreements (BOA)
- Blanket Purchase Agreements (BPA)

FAR 16.701-16.703

Guide for Small Business

A basic agreement is a written instrument of understanding, negotiated between an agency or contracting activity and a contractor, that contains contract clauses applying to future contracts.

It anticipates separate future contracts that will incorporate – by reference or attachment -- the required and applicable clauses agreed upon in the basic agreement.

A basic agreement is not a contract.

Let's take a look at Basic Order Agreements and Blanket Purchase Agreements.

Notes:

Basic Order Agreements (BOA)

Agreements -- Type of Contracts

- BOA is a written instrument of understanding that contains:
 - Terms for future orders
 - Description of supplies or services to be ordered
 - Methods of pricing, issuing and delivering
- Not a contract

Guide for Small Business

A basic order agreement is a written instrument of understanding, negotiated between an agency or contracting office and a contractor, that contains: (1) terms and clauses applying to future contracts, (2) a description of supplies or services to be provided, and (3) methods for pricing, issuing, and delivering future orders under the basic order agreement. Again, the a basic order agreement is not a contract.

A basic order agreement may be used to expedite contracting for uncertain requirements for supplies or services when specific items, quantities, and prices are not known at the time the agreement is executed, but a substantial number of requirements -- for the type of supplies or services covered by the agreement -- are anticipated to be purchased from the contractor.

Notes:

Blanket Purchase Agreements

Agreements -- Type of Contracts

- BPA is a simplified method of filling anticipated repetitive needs for supplies or services by establishing “charge accounts” with qualified sources of supply
- May be established when:
 - Broad class of supplies or services are needed but exact items, quantities and delivery requirements are not known
 - Need to provide commercial sources of supply
 - BPA would avoid writing numerous purchase orders
 - No existing requirements contract

FAR 13.303-1-7

Guide for Small Business

A blanket purchase agreement is a simplified method of filling anticipated repetitive needs for supplies or services by establishing “charge accounts” with qualified sources of supply. BPAs are typically established for use by an organization or agency responsible for providing supplies for its own operations or for other offices, installations, or functions.

The following are circumstances under which BPAs are established:

There is a wide variety of items in a broad class of supplies or services that are generally purchased, but the exact items, quantities, and delivery requirements are not known in advance and may vary considerably. Or, the use of this procedure would avoid the writing of numerous purchase orders. And, there is no existing contract vehicle for the same supply or service that the contracting activity is required to use.

Notes:

8(a) STARS II-- GWAC

- Awarded by the GSA on July 29, 2011 as an 8(a) small business set-aside
- Second generation – Streamlined Technology Acquisition Resources for Services (STARS)
- Promotes small business utilization for agencies acquiring IT services
- Reserved exclusively for qualified 8(a) certified small businesses

Guide for Small Business

So, we have discussed contracting methods and types of contracts and agreements used by the government. Let's look at an example.

Recently, the GSA awarded the 8(a) STARS II – GWAC, set-aside for 8(a) certified small businesses. This is the second generation Streamlined Technology Acquisition Resources for Services contract.

This GWAC was awarded on July 29, 2011 and is designed to promote small business utilization when agencies are purchasing information technology services or IT-based solutions. The STARS II program is reserved exclusively for qualified 8(a) certified small businesses.

Notes:

DOD -- MATOC

- Multiple Award Task Order Contract
- Vehicle used to support DOD construction and construction support projects
- Set-asides are available through this vehicle

Guide for Small Business

Another example is a Multiple Award Task Order Contract used by the Department of Defense.

This vehicle is being used to support DOD construction and construction support projects. Such a buying vehicle is currently being used to support Air Force Installations East of the Mississippi. In this case, set-asides are available for 8(a), HUBZone, SDVOSB and other contract pools.

Notes:

THE RULES

The Rules

- You have to know the rules, to play in the game
- [Federal Acquisition Regulation \(FAR\)](#) outlines the rules
- Key small business parts of the FAR include:
 - Subpart 8.4 – Federal Supply Schedules
 - Part 13 – Simplified Acquisitions
 - Part 14 – Sealed Bidding
 - Part 15 – Contracting by Negotiation
 - Part 16 – Types of Contracts
 - Part 19 – Small Business Programs

Guide for Small Business

Understanding the government’s procurement rules is critical to the success of a small business wanting to participate as a government contractor. The FAR is the roadmap for doing business with the government. It outlines all of the rules.

It is a comprehensive guide indexed by topic. It is an excellent resource tool. The most common FAR sections used by small business are:

- Subpart 8.4 – Federal Supply Schedules
- Part 13 – Simplified Acquisitions
- Part 14 – Sealed Bidding
- Part 15 – Contracting by Negotiation
- Part 16 – Types of Contracts
- Part 19 – Small Business Programs

Notes:

Conclusion

- Thank you for participating in Part 2, of the Government Contracting 101 training program
- Review Parts 1 and 3
 - Government Contracting and Certification Programs
 - How to Sell to the Government

Thank you...

Guide for Small Business

Thank you for participating in Part 2, of the Government Contracting 101 training program. Much information was covered and we hope it is helpful in understanding how the government buys goods and services.

Please also review parts 1 and 3, which provide clarity and training around government contracting and certification programs and, how to sell to the government.

Thank you.

Notes:
