

## North Dakota

Small businesses totaled 61,760 in North Dakota in 2009. They represent 96.0 percent of all employers and employ 60.2 percent of the private-sector workforce. Being such a large part of the state's economy, these businesses are central to North Dakota's health and well-being.

This profile uses the latest available data to illustrate the status of North Dakota's small businesses. (Note that a small business is defined as one with fewer than 500 employees.)

- North Dakota's economy was strong in 2010, with real gross state product increasing 2.0 percent and private-sector employment increasing 2.4 percent (Bureau of Economic Analysis, Bureau of Labor Statistics).
- Most of North Dakota's small businesses are very small as 71.4 percent of all businesses did not have employees and most employers have fewer than 20 employees.
- Small businesses employed 178,324 workers in 2009 (Table 1) with most of the employment coming from firms with 20-499 employees.
- While the employment situation in 2008-2009 was weak (Table 2), small businesses in North Dakota represented 43.4 percent of the net new private-sector jobs from 2005-2008.
- Self-employment in North Dakota surged over the last decade. Minority self-employment fared the best compared with other demographic groups during the decade.\*
- Throughout 2010, the number of opening establishments was higher than closing establishments and the net employment change from this turnover was positive (Table 3).
