

## **2017 Home-based Business Champion**

James “Jim” Foster provides coaching, training and mentoring to individuals who aspire to own a business, small business owners and non-profits. He is also a speaker, author and specializes in business plan writing.

He founded the Georgia Home-based Business Chamber of Commerce in 2010 to provide business education, training, community outreach and networking events for a business niche that had been totally neglected by traditional organizations; such as the local chambers of commerce.

Jim’s mission is focused on assisting the aspiring entrepreneur, those businesses who are struggling to gain deeper understanding of business concepts and principles. He helps them apply these concepts to relieve their struggles to grow a more profitable business.

Jim and his organization speaks specifically to the needs of this niche by providing services through seminars, expos, individual mentoring, recognition and award ceremonies, and also by partnering with other groups to reach a broader audience.
